

ABSTRACT OF THE DISCLOSURE

An apparatus for and method of utilizing an Internet terminal coupled to the world wide web to interface with an existing proprietary data base management system by permitting a developer to create a web based service that produces a table result. This result can be rendered to the web either by a Cool ICE Script or by an Active Server Page. The table may appear either as an HTML table or a graph. The service is defined as a plurality of ordered, discreet, and independent steps. Each step may be created and/or edited independently of all other steps.
